Full Stack Developer (MERN Stack)

Self-taught Full Stack Developer with hands-on experience building modern web applications using the MERN stack. Completed an intensive 6-month MERN bootcamp at Evangadi while independently developing production-ready projects. Passionate about writing clean, maintainable code, building responsive user interfaces, integrating APIs, and delivering scalable full-stack solutions. Strong problem-solving skills with a continuous learning mindset and a focus on quality software development.

WORK EXPERIENCE

Journey • 01/2023 - Present

Self-Taught Full Stack Developer

- Built and deployed 5+ full-stack and frontend applications.
- Developed responsive web applications using React and Node.js.
- Designed REST APIs and integrated databases.
- Practiced Git-based version control and collaborative workflows.
- Focused on clean architecture, maintainable code, and performance optimization.

PROJECTS

Smart Scheduler

- Developed a full-stack scheduling application with frontend and backend integration.
- Built RESTful APIs for data management.
- Connected the application with a MySQL database.
- Focused on responsive UI and clean architecture.

ChatGPT Clone

- Built an AI-powered chatbot application using the Groq API.
- Designed a responsive React frontend.
- Implemented backend API communication.
- Managed asynchronous data flow for real-time responses.

Netflix Clone

- Recreated the Netflix user interface using reusable React components.
- Built a responsive and modern frontend.
- Applied component-based architecture and clean styling.

Apple Clone

- Developed a pixel-perfect recreation of Apple's landing page.
- Implemented responsive layouts and interactive UI elements.
- Strengthened advanced CSS and JavaScript skills.

SKILLS

Frontend: Bootstrap, CSS3, HTML5, JavaScript (ES6+), React, Tailwind CSS

Backend: Express.js, Node.js, REST API Development

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, Vite, VS Code
